Experience

Senior Frontend Engineer, Mindful Chef

09/2023 - 02/2024 (6 months)

📍 London, UK

- Led the development of a custom CMS solution, enabling the marketing team to manage and publish content independently, improving efficiency and reducing time-to-market
- Made updates in key areas such as onboarding, filtering and checkout, improving user experience and engagement
- Created and maintained complex A/B tests for feature experimentation, enabling data-driven decisions that increased conversion rates
- Followed TDD practises for new projects and features, often pairing with other colleagues in the team

Frontend Engineer, Mindful Chef

03/2022 - 09/2023 (1 year 7 months)

📍 London, UK

See above

Senior Frontend Developer, LuxDeco

01/2020 - 07/2021 (1 year 7 months)

📍 London, UK

- Worked on a small team to build a new platform for the company, to bring the tech in-house and reduce reliance on third party services
- Worked with back-end & UX to create a new CMS with React which included a product management, warehousing and invoicing system
- Made updates to key areas of the website including search, filtering and product pages and implemented a variety of landing pages and blogs

Frontend Developer, Pulselive

02/2018 - 01/2020 (2 years)

📍 Basingstoke, UK

- Joined the platform team, responsible for the management and delivery of all core services within the company
- Worked primarily on building new features for the CMS - the company's all-in one solution for creating and managing client content, websites and apps
- Worked with UX & back-end to deliver exciting new features for clients such as FC Barcelona, World Rugby and the Premier League as well as maintaining and improving existing code
- Managed deployments, release logs and wrote documentation for new features for both technical and non-technical audiences

Experience

Web Developer, British Software Development

06/2017 - 02/2018 (9 months)

📍 Bournemouth, UK

- Managed the build of a full-stack MEAN application which included a REST API and multilingual embeddable widget
- Created a procurement platform with over 40 screens using Vue.js and Vuex
- Created detailed quotes for new pieces of work. Oversaw junior developers at work, helping and assisting wherever needed

Junior Web Developer, British Software Development

11/2016 - 06/2017 (8 months)

📍 Bournemouth, UK

- Helped senior developers with bugs and features for both desktop and mobile using a variety of different frameworks including Angular, Ionic, WordPress and Laravel
- Worked on full-stack web apps, hybrid mobile apps, WordPress sites and anything else in-between
- Also helped with analytics using tools such as Google Tag Manager

Online Shopper, Sainsbury's

08/2013 - 08/2016 (3 years 1 month)

📍 Poole, UK

- Worked early morning shifts while finishing my degree and subsequently teaching myself how to code
